

Ace Anodizing & Impregnating, Inc. Plant Expansion Underway!

Press release date: January 8, 2018

Hillside, Illinois (January, 2018) – Ace Anodizing & Impregnating, Inc. Is happy to announce their long awaited plant expansion is well underway with a projected move in date sometime in Q1 of 2018.

The addition will bring total plant square footage to upwards of 80,000 sq. ft.

The expansion will allow for the addition of **long length** chemical polishing capabilities on aluminum for **parts up to 282”**. That and additional dock space will allow for streamlined product flow and increases in efficiency and throughput.

ACE also expects to greatly expand their powder coating operation in 2018 as well as add a new cutting department to better serve the **lineal extrusion market**.

Mike Battaglia, VP Sales & Marketing at ACE said:

“With the addition of the chemical polishing capability to our large anodizing line, a new extrusion cutting department and a more efficient plant layout, we can better serve our existing clients and fill yet another need in the marketplace”

Ace’s capabilities include anodizing services, chromate conversion, powder coating services and resin impregnation. Ace is ISO 9001:2008 certified and provides quick turns at competitive prices and can handle parts up to 282” long.

Ace is headquartered in Hillside, Illinois.
